

Alex Berrios Mangual

IT Systems Specialist | Commercial Operations & Automation

Puerto Rico | support@alexberrios.com | alexberrios.com | linkedin.com/in/alex-berrios-mangual-b26b5a241

PROFESSIONAL SUMMARY

IT Systems Specialist with experience across commercial operations support, network operations, automation, endpoint management, documentation, and user-facing technical support. Builds practical tools and repeatable workflows using Python, databases, knowledge-base platforms, device management, monitoring, and structured troubleshooting. Known for connecting business processes with reliable systems, clear documentation, and calm operational support.

TECHNICAL SKILLS

Systems & Support: Windows, Linux, troubleshooting, SLA response, incident documentation, user support, hardware/software testing

Automation & Data: Python, PostgreSQL, Firebase, reporting workflows, process automation, Tkinter desktop tools

Endpoint & Platforms: Microsoft Intune, Android Enterprise, Zebra devices, BookStack, osTicket, SAP procurement workflows

Network & Infrastructure: Fortinet, SolarWinds, Cacti, Proxmox, VMware, Docker, DNS, DHCP, TCP/IP, VPN, VLANs

PROFESSIONAL EXPERIENCE

IT Specialist Novus Inc.

Aug 2025 - Present

- Support commercial operations systems, user workflows, endpoint needs, documentation, and technical issue resolution across business-critical processes.
- Build automation and reporting improvements using Python, structured data, and operational process analysis to reduce manual work and improve consistency.
- Manage and support mobile and endpoint workflows, including Zebra device fleet operations, Intune controls, Android Enterprise enrollment, and inventory visibility.
- Improve support handoff through BookStack documentation, osTicket workflows, and repeatable troubleshooting procedures.

NOC Tier 1 WorldNet

Sep 2021 - Aug 2025

- Provided network monitoring, customer support, troubleshooting, and SLA-driven incident response for production network environments.
- Managed outage alerts, communication follow-up, repair processes, and escalation details to support timely resolution and minimize downtime.
- Used SolarWinds and Cacti to monitor performance, identify anomalies, analyze bandwidth and device metrics, and support operational decision-making.

- Worked with Fortinet, Juniper, MikroTik, Adtran, and Cisco network equipment while collaborating with cross-functional teams on issue resolution.

SELECTED PROJECTS

SAP Procurement Automation

Built Python/PostgreSQL automation support for procurement workflows, structured records, repeatable checks, and operational visibility.

NOC Reporting Tool

Built a Python/Tkinter/Firebase reporting tool focused on faster shift reporting, consistent data capture, and accessible operational records.

BookStack + osTicket Platform

Implemented a support knowledge loop connecting ticket intake with searchable documentation and reusable procedures.

Zebra Device Fleet

Supported an 88-device Zebra fleet using Intune and Android Enterprise practices for enrollment, app policy, inventory, and support consistency.

CERTIFICATIONS

Fortinet Certified Associate Cybersecurity - Fortinet / Credly

Fortinet Certified Fundamentals Cybersecurity - Fortinet / Credly

EDUCATION

Network Technology and Applications Development - NUC University, Bayamon, PR
| 2017 - 2022

ADDITIONAL

Photography, graphic design, photo retouching, homelab infrastructure, server management, technical documentation, and self-hosted systems.
